

## **Trustee Report 2021**

Due to the ongoing COVID pandemic, usage of the church facility was greatly diminished again this past year. This resulted in very little new wear and tear to the interior of the building.

On June 1, 2021, Con Pile Construction Co. started the demolition and replacement of the front steps and outdoor entrance area of the church. A wheelchair ramp, re-furbished railings, and an automatic door opener were also installed. The project was completed in Fall of 2021.

Thank you to Robert Martens and Bill Loewen for your input, leadership and work in regards to this project. Thank you to Ken Loewen for the art work within the railings.

Funds from the Bequest Fund and donations covered the cost of this project.

Recording equipment and a new sound system were purchased this year to help with the online church services. Thank you to Kevin Neufeld for your leadership and hours of setup.

The church has been in contact with Valley Fiber Internet to have the internet upgraded, the pipe has been trenched in, now waiting for hookup.
